

WHAT'S DIFFERENT? In “high noise zones,” like chain link fencing, the meter displays polarity of fence, then, holding wand perpendicular to the fence, the display will “flip” + or—when over the rebar; a visual indicator of location.... Prove it for yourself, try our demonstrator while your locator is in for a repair or tuning.

KLEIN SURVEY SYSTEMS -1.800.822.2711

Lifetime Warranty in the U.S. If you don't run over this with a truck or throw it in a pond—you'll probably never pay for repairs again!

- First and only One-Piece strong, ‘mono-tube’ - aluminum tube goes all the way through—tip to tip
- Sensors are epoxied in their own tube inside the yellow tube for extra strength and secure alignment.
- Build-in Handle—not an add-on, handle cannot “get loose”
- Meter or No Meter? Same size, same controls, same sound, identical units.
- **LCD Metered unit—reports polarity, signal strength, gain or sensitivity settings, and low battery warning.**
- First with One hand Operation.
- Electronic Key Pad—no switches to break or knobs to fall off.
- Water proof up to Electronics box.
- Includes two 9-volt alkaline batteries
- Includes ABS Hard Case not shown.
- Includes Soft Carrying Case with internal pouch for manual and spare batteries.

**Survey-Construction- Utility
Municipality-Public Works
Military-Unexploded Ordinance**
